A pure love story where the special effects give you an illusion that you are on a spaceship but the reality is – Category: Indian films Category: Krrish filmsThe Yarrow project The Yarrow project The Yarrow Project's Yarrow is a range of organic herbal-based cosmetics and skincare products which are derived from natural plant ingredients and the Yarrow plant in particular. We believe that beauty is about much more than surface appearance and we also believe that if you're going to spend time and money on being pretty then you may as well do it in the most ethical and sustainable way possible. While a few herbal products have made it into mainstream beauty, the majority of them still require their raw materials to be extracted from raw plants and plants in their natural state are dying off at an alarming rate around the world. In fact, more than half of the world's plant species are now endangered and many of them are being poached for the plant's raw materials. This makes Yarrow a very important project and the ingredients sourced from the Yarrow plant have been rigorously researched and verified to be both safe and effective. Unlike most herbal beauty products which are derived from plants sourced from the wild such as yarrow and other raw plant material, the Yarrow products have been researched and sourced from specially cultivated plants in the UK. The plants have been grown in an organic, farm-based, certified organic supply chain which conforms to the certification standards set out by the Soil Association. Yarrow was grown in 2015 in Hill Top Organic Farm, southwest of London, using a variety of traditional growing methods to grow tall, strong, healthy plants for the best possible quality and consistency. The Yarrow flowers and plants used for making our skincare and herbal products are grown in separate parts of the farm, allowing them to grow in harmony without being over-groomed by neighbouring plants. The Yarrow plants also grow in our factory where the plants are individually hand-plucked, blended, fermented and bottled. The unique process of fermentation creates a gentle yet powerful 'dew' which washes and nourishes the skin at the same time. What is Yarrow? Yarrow, aka Achillea millefolium, is an herbaceous perennial which is native to Northern Europe. It has been widely used in traditional medicine for hundreds of years to relieve pain, reduce fever, and
