Creating a custom form from inside my module? In Drupal 7, is it possible to create a custom form directly from inside my module? I want to create a simple "Save" button that will create an entity, and have it be saved automatically. How would I go about doing this? A: Try this :

```
function mymodule_form_alter(&$form, &$form_state, $form_id) {  
  $form['actions']['submit']['#submit'][]  
  = 'mymodule_form_submit'; }  
function mymodule_form_submit($form, &$form_state) {  
  $node = new stdClass();  
  $node->created = date('Y-m-d H:i:s');  
  $node->title = 'test node';  
  node_save($node);  
  return [ '#markup' => 'Test!' ]; }
```

Make sure you also add this module to the form's allowed actions function mymodule_form_alter(&\$form, &\$form_state, \$form_id) { \$form['actions']['submit']['#access'] = ['node/add/test'] }

Republican Party of New York The Republican Party of New York is a political party in the State of New York. It has a historical association with the Republican Party in the United States. From 1894 to 1968, the New York Republican Party was in the majority in the state legislature, and, from 1896 to 1968, it also had an outsize influence on state politics. The split in the Republican Party was initiated by Governor Nelson Rockefeller, who was a prominent Democrat. During the 1964 presidential election, the state's moderate Republican governor, Rockefeller, attempted to balance the
