Jun 12, 2014 In Half-Life: Opposing Force, servers may have an official gaming server. . Oct 10, 2017 I started with the Jumbot bot for Half-Life. Later i was working with Apache WebServer. 2000s - Early Access - the first day in 2007. Jumbot 1.0 July . Oct 13, 2017 Hacker vs. Jumbot bot half-life 2.4 Jumbot 1.0 - 1993 - bot for Half-Life. Dec 6, 2017 Interesting Reads: OP-Half-life-Alpha-Stage-6 - An old IRC. . Jun 17, 2017 Show Previous Posts: previous half-life half-life-op-alpha-stage-3 - archive of this blog. Aug 4, 2017 New Connection: All MLACs Connect at the Same Time - For Beta Testing. (MLAC 3.0.5). . Aug 4, 2017 Current Version: 3.0.5 Category:Video game mods Category:Half-Life modsQ: Problem with the normal distribution and a test based on the normal distribution Consider the following question: Question: In a medium sized sample of 1000 individuals, the ratio of men to women is 12/3. What is the standard deviation of this ratio? The answer is 8.1401. In my understanding, this question is equivalent to testing the hypothesis  $H_0: \mu = \frac{12}{3}$  against  $H_1: \mu \neq \frac{12}{3}$  where  $\Sigma \mu$  is the mean of the ratio. I know that if we test the hypothesis  $H_0: \mu = \frac{12}{3}$  against  $H_1: \mu \neq \frac{12}{3}$  using a sample of size  $n=1000$ , we would use  $Z = \frac{\bar{X} - \frac{12}{3}}{\sqrt{\frac{12}{3}(1 - \frac{12}{3})}} \approx 4.8012$  as the critical value. Does that mean that in the above question, we are testing  $H_0: \mu = \frac{12}{3}$  against  $H_1: \mu \neq \frac{12}{3}$
