LanSchool 7.0.0.7 Teacher And Student Version Sep 11, 2020 0.7 Teacher and Student Version is a very convenient classroom management program application which will keep the students occupied and they will . Q: How to setup a 12v relay for a project with more than 1 line of periphikal I am working on a project that includes more than 1 periphikal line and I need to setup a 12v relay At the moment i am using 2 relays, one with an input called input and one with an output called output. The problem with that is that when I have to use both relays or just one of them the input and output are linked together so that if I pull the line I get the output and vice versa. I am working on a microcontroller and I would like to avoid using a main power supply and need to use only 12v. Is there a way to share the voltage between the input and output without using an
