i have 7.00.0.01 Well, if you want. If not I won't be offended i have to turn it on and off the phone then windows pops up and i have to turn bluetooth off/on in the bios then windows pops up and i have to turn bluetooth off/on in the bios then windows pops up i dont want to have to do that every time i restart hi all shauntabket: there might be a way to get it to default to it's own setting perhaps ask #windows yeah it could be, idk if its a windows only thing or not !bluetooth | shauntabket shauntabket: For instructions on how to set up bluetooth, see sorry ubottu, thanks shauntabket, happy2help! thanks cfhowlett shauntabket: you don't need to do it manually my system reboots when i press ctrl-alt-del. How can i fix it? I'm using ubuntu 14.04, with kernel 4.0.0-23 Hi how to chanel? Iregister | Lavinho Lavinho: Information about registering your nickname: - Type ^< /nick ^> to select your nickname. Registration help available by typing /join #freenode iill100oL, pastebin the entire dmsg cfhowlett, i'm using server GeekDude, i did that on my windows side, but on linux it doesnt seem to work shauntabket: so you know the bluetooth is working? f3e1b3768c
