See also List of applications with known security vulnerabilities Security References Category:AutodeskVirus entry inhibitors in development. Significant progress has been made in the past decade in the development of antivirals directed against human immunodeficiency virus (HIV) and hepatitis C virus (HCV). New classes of antivirals are being designed and developed by using two strategies: targeting the viral life cycle, and inhibiting

the invasion of host cells by virus entry. Strategies being pursued include the development of virus entry inhibitors, chemokine receptor antagonists, fusion inhibitors, and nucleic acid-based anti-HIV and anti-HCV drugs. New drug candidates with novel structures and mechanisms of action are in preclinical and clinical development. This review describes the current status of antiviral drug development against HIV and HCV.Q:

Saving dynamic images from android I have a little project to save some dynamic images to a simple android app.

It's just to learn so it doesn't have to be something big but still need to learn how it works so there's going to be some learning involved. I'm able to read the file and create my ImageView with the bitmap but then if I'm trying to save it with: `fileOutputStream.write(array[i]);` or `//byte[] bitmapByte = b.toByteArray();` It crashes the app, I do that same thing with the ArrayList in another activity. How can I save the images and load it in a View? Here's the

```
code I have:
ImageView button;
@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_capture);
    button = (ImageView)
        findViewById(R.id.button);
    Button save = (Button) findViewById(R.id.save);
    save.setOnClickListener(new
        View.OnClickListener() {
            @Override
```
