We have previously reported that cytokine treatment of macrophages results in increased expression of the lipoprotein lipase (LPL) gene and increased lipid accumulation (Beall, G. W., and Allen, D. B. (1992) J. Clin. Invest. 89, 1749-1755). We now report that cyclic AMP analogs induce a 3-4-fold increase in LPL mRNA levels in human monocyte-derived macrophages. Increased LPL mRNA levels are accompanied by an increase in LPL activity, and the increases are inhibited by the protein synthesis inhibitor cycloheximide. These results indicate that cyclic AMP is involved in the regulation of LPL gene expression in macrophages. to \$27,000 in 1976. We think that the fact that the capital gains earned in the years 1975 and 1976 were substantially attributable to the investment in the partnership is indicated by the fact that the Commissioner allowed a capital loss on the amount realized from the sale of the partnership assets in 1975, and by the fact that the capital losses so realized were carried back to the years 1967 and 1968 and thereby reduced the gains of the years 1973, 1974, and 1975. The net effect of this adjustment is to reduce the amount of capital gains realized in the years 1976 and 1977 by approximately \$17,000. The Commissioner allowed an additional reduction of \$10,000 in 1979 because the partnership's interest in the income-producing property was not productive for the tax year in which the sale of that property was made. Thus, the Commissioner treated the sale of the property in 1978 as a sale of partnership interests in that property. In the years 1976 and 1977, which were the tax years involved in this litigation, the sale of this property was treated as a sale of partnership interests in the property in the years 1975 and 1976, but was treated as a sale of capital assets for the year in which the sale was made in 1978. The taxpayer argues that it should not be penalized for the Commissioner's failure to follow prior practice and that it should have been allowed to carry back the losses from the sale of the partnership interest in 1976. However, if we were to adopt the taxpayer's argument, we would be allowing the taxpayer a \$10,000 reduction in the amount
