One of the newest apps to hit the market, FireVideo is a very useful app for anyone who needs to create HD movies or videos for his or her website. With its simple interface, you can create videos using a variety of methods, which include using a webcam, importing videos from a folder, or even importing videos from a popular video sharing website like YouTube or Vimeo. No matter how many different ways you create your videos, you can choose to either have them automatically exported to the hard drive, or create a file and upload it yourself. FireVideo can also act as an online screen recorder, so you can capture a video of your desktop, so you can upload it anywhere. In addition, you can have your movies uploaded to Facebook, YouTube, Twitter, Vimeo, or the default destination folder. FireVideo Features Create videos with the webcam. This may seem like a simple task, but it can be quite complex. For example, you can set up the recording area for the webcam, you can set it to auto adjust to the lighting, or even you can set up the microphone to record audio separately. Import video. You can copy any video files on your hard drive and paste them into FireVideo. You can also copy the URL of a YouTube video or Vimeo video, as well as the URL of any video on your computer, and paste it into the program. Automatic upload. FireVideo can automatically upload your videos to popular social networking sites like Facebook and YouTube, making it easy to share your work. Edit video. You can easily trim the length of your videos, make them full screen, and add transitions. You can also crop images in your video clips, change the color scheme, and adjust the volume and contrast. Export video. You can export your videos in different file formats, including MP4, AVI, MOV, and MPEG. If you want your videos to be compatible with other programs, you can export them to different formats like MP3, AIFF, WAV, and FLAC. What's New In ACDSee Luxea Video Editor?

With the classic menu structure, you can easily create amazing photographs! The interface is clear, intuitive and easy to learn. You can use your own professional camera. Photos are shown in a number of ways: as a photo album, as a list of images, or as a slide show. You can preview photos in the picture viewer, with the option of printing them. Although the premium version of CameraDV features all the functions of the regular version, it does have some additional functions like Photoshop-like plug-ins and tools. For instance, there are tools like the Clone Stamp and the lasso selection tool. Another useful function is the RAW file format support, which means you can convert any RAW photo to your desired photo format. There are numerous basic photo editing features, including straightening and cropping. You can also enjoy a wide variety of templates to choose from, including any of your favorite themes, calendars, and kids themes. If you do not have Photoshop, then you can find free photo editing software on the Internet and use it to fix minor flaws in your photos. 1 of 1 people found this review helpful Van 23.12.2016 Overall: Quality: Performance: Comfort: I bought this app a while ago when it first came out. It is still one of my favorites. I like that I can use my camera. There is a wide selection of filters to apply to the images. You can also crop, sharpen, and straighten. I bought the 2 year premium membership and use the fx designer plug-in quite a bit. It allows me to create my own templates. I also use the previews as a camera. I can always see what I am about to shoot. Pros Camera integration Wide variety of filters Good interface Templates Cons Hard to figure out where everything is. How do you turn off your phone? If you use the fx designer you can't use the preview. 0 of 1 people found this review helpful Scott 20.06.2017 Overall: Quality: Performance: Comfort: While this app does offer some great features, the workflow is extremely clunky. It is not terribly intuitive and there is no transition between the various modes. This can make it hard to go from edit to print to share, especially if you want to share the finished product with a few friends. I would recommend using a more intuitive application. Awesome app. It's such a nice way to save time and quickly edit your pictures. The price is very reasonable and all the features you need are included. It has an excellent user-friendly interface and a user-friendly editor. The key feature is that you can edit and use your
