When you release the mouse button, the Brush tool snaps to the closest point to the mouse. If you move the mouse over an area that is not covered by the Brush tool, the tool will fill the area with the brush from the previous location. The Brush tool comes with a variety of brush tips, such as the Round brush, the pencil, and the Airbrush. The Brush tool tips come in a variety of colors, so you can easily see which tip you are using. You may want to change your brush tip colors to a more visible color.
