The University of Alabama is the first to receive a grant through the newly formed "Community College Partnerships for STEM Education" from the U.S. Department of Energy. The \$3.1 million grant will be used to fund projects that will increase access to introductory and upper-level physics, chemistry and biology courses at community colleges in Alabama. Foundation donors include foundations of the Alabama Community College System, Vulcan Foundation, University of Alabama Foundation and the estate of John W. Drake, the Chairman and CEO of Vulcan Materials Company. "The state's community college system serves a vital role in training the workforce," said U.S. Energy Secretary Ernest Moniz, announcing the grant. "We are pleased to support the College Partnerships for STEM Education and the efforts of Alabama's community college leaders to promote access to science, technology, engineering and math, which are essential components of the U.S. economy." "CSPE supports projects that offer the advantage of undergraduate and community college students," said David G. Campbell, director of CSPE and director of the Center for Students, Innovation and Service in the U.S. Department of Energy. "It allows institutions to elevate the participation of students and faculty in meaningful projects that improve the system's teaching, learning and research missions." According to the U.S. Department of Energy's estimate, Alabama's community college system is the state's largest institution with more than 270,000 students enrolled. "The grant will allow us to build on the success we have had with our combined efforts of the colleges and universities in this effort," said Walter J. Preisk, president of the Alabama Community College System. Alaska has received \$24 million to help develop new careers in the oil and gas industry. The money goes toward job training, apprenticeships and workforce development programs. All workers in Alaska's energy industry need to be trained and qualified, but Alaska ranks as one of the most difficult states for finding work
